SUMMARY

Full Stack MERN Developer with 4+ year of professional experience designing, building, and deploying scalable web applications. Proficient in React.js, Node.js, Express.js, MongoDB, REST API development, JWT authentication, and real-time systems using Socket.IO. Delivered 5+ client projects on PeoplePerHour with 5-star ratings. Built production-grade applications including a SaaS School Management System and a real-time chat platform serving 15+ concurrent users. Strong foundation in JavaScript (ES6+), data structures, version control with Git, and agile development practices. B.S. Computer Science student (CGPA 3.84) at Arid Agriculture University Rawalpindi.

SKILLS

Languages: JavaScript (ES6+), TypeScript (basic), Python, C++
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design
Backend: Node.js, Express.js, REST API Development, JWT Authentication, Socket.IO
Databases: MongoDB, Mongoose, MySQL, PostgreSQL
Tools: Git, GitHub, Postman, VS Code, npm, Vercel, Render, Linux (basic)
Concepts: MVC Architecture, Agile, SDLC, OOP, Data Structures, Authentication and Authorization, Web Security Basics

WORK EXPERIENCE

Full Stack Developer (Freelance) *January 2024 - Present*
PeoplePerHour | Remote

- Engineered 5+ full stack web applications using React.js, Node.js, Express.js, and MongoDB for international clients, achieving mostly 5-star ratings across all engagements.
- Designed and implemented secure REST APIs with JWT authentication and role-based access control, delivering zero security incidents across all client deployments.
- Reduced client onboarding time by standardizing project architecture with reusable React.js component libraries and modular Express.js API structures.
- Managed end-to-end project delivery independently, from requirements gathering through deployment on Vercel and Render, consistently meeting agreed deadlines.

Web Developer *August 2025 - November 2025*
Softezm | Rawalpindi, Pakistan

- Led full stack development of a SaaS School Management System using React.js, Tailwind CSS, Node.js, and Express.js, enabling management of student records, timetables, and staff dashboards in a single platform.
- Integrated React.js frontend with Node.js REST APIs to deliver real-time data updates across the admin dashboard, improving operational efficiency for school administrators.
- Established Git branching conventions for a 3-person team, reducing merge conflicts by standardizing pull request reviews and feature branch workflows.

MERN Stack Developer Intern *July 2025 - September 2025*
Crypstac | Rawalpindi, Pakistan

- Contributed full stack MERN features to a live production application by building React.js UI components and Node.js/Express.js REST API endpoints under senior engineer supervision.
- Integrated MongoDB collections with RESTful endpoints, improving data retrieval efficiency for the company's core product used by active users.
- Refactored 5+ UI modules into reusable React.js components, reducing code duplication and cutting future development time for similar features.

PROJECTS

QuickChat - Real-Time Chat Application | React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT Live Demo

- Built and deployed a real-time messaging application supporting 15+ concurrent users with instant messaging, online presence tracking, and typing indicators using Socket.IO WebSockets.
- Secured all API routes and WebSocket connections with JWT authentication, implementing protected endpoints and session validation across the full stack.

Classic Boats — Private Boat Marketplace | React.js, Node.js, Express.js, MongoDB, Stripe, Cloudinary, JWT [Live Demo]

- Built a full-stack private marketplace for classic & vintage boat enthusiasts with member approval workflow, admin dashboard, and 10 group rules enforced in code.
- Integrated Stripe Checkout for $19 listing fees with webhook handling, and Cloudinary for photo/video uploads with auto-resize (max 5 photos + 1 video per listing).
- Implemented JWT auth with role-based access (admin/member), 90-day listing expiry, duplicate post prevention, and 120-word description validation.

AI-Based E-Commerce Platform | React.js, Node.js, Express.js, MongoDB, Cloudinary, Stripe, JWT

Live Demo (Store) | Admin Dashboard

- Developed a full-stack e-commerce platform with dual interfaces: customer storefront and comprehensive admin dashboard for complete store management including product, category, and order tracking.
- Integrated Stripe payment gateway with webhook handling for secure checkout processing, and Cloudinary API for optimized product image management with automatic compression and CDN delivery.
- Implemented JWT-based authentication with role-based access control (admin/customer), shopping cart persistence, order history tracking, and real-time inventory management across the full stack.

Blogify - Full Stack Blogging Platform | React.js, Node.js, Express.js, MongoDB, JWT Live Demo

- Developed a production-ready blogging platform with secure user authentication, full CRUD operations on rich-text posts, dynamic routing, and server-side pagination.
- Designed a fully responsive interface using React.js that renders consistently across mobile, tablet, and desktop screen sizes without layout breakage.

E-Commerce Website | HTML5, CSS3, JavaScript Live Demo

- Built a responsive e-commerce frontend with product category filtering, promotional banners, and interactive cart UI, achieving consistent rendering across all major browsers.

EDUCATION

Bachelor of Science in Computer Science *2023 - 2027*
Arid Agriculture University Rawalpindi
CGPA: 3.84 / 4.00 | Relevant Coursework: Data Structures, OOP, Database Systems, Web Technologies, Software Engineering

F.Sc Pre-Engineering *2020 - 2022*
Punjab Group of Colleges, Gujar Khan

Grade: A+
