SUMMARY

Full Stack Engineer shipping production software since July 2025, currently in two concurrent roles (remote with a US team at AlxTel, on-site at AizTek). Build features end to end across React and Python/FastAPI or Grails/Groovy backends, on a multi-tenant government-contracting SaaS, as lead developer on the rebuild of a live UK funeral-plan platform, and on LLM features such as text-to-SQL and hybrid RAG.

SKILLS

Languages & Frontend: Python, JavaScript, TypeScript, Groovy, Java, SQL · React.js, Next.js, Vite, Redux Toolkit, Tailwind CSS
Backend & Data: FastAPI, Grails/Spring Boot, Node.js, Express.js, REST APIs, JWT/RBAC · PostgreSQL, MySQL, MongoDB, Meilisearch
AI & LLM: LLM integration (Groq, Gemini, OpenAI SDK), text-to-SQL, RAG, ChromaDB, sentence-transformers, structured outputs
DevOps & Testing: Docker, Docker Compose, CI/CD (GitHub Actions, Bitbucket), Nginx, AWS EC2, Linux, Playwright, Postman
Integrations: Stripe, GoCardless, Xero, HubSpot, RabbitMQ, Twilio, SendGrid, Cloudinary

WORK EXPERIENCE

Full Stack Engineer · AlxTel, Inc. · Remote (US-based team) *Apr 2026 – Present*

GovOps360, multi-tenant government-contracting SaaS · *React 18, Redux Toolkit, Ant Design, Grails 7, PostgreSQL, Meilisearch, Stripe*

- Built and maintained modules across leads, quotations, proposals, purchase orders and subcontractors, including KPI tiles, filters, pipeline totals and a public subcontractor sign-up with approve/reject workflow.
- Built Opportunities Intel tabs (FEMA, NIH, agency and award reports) on database-driven data with scheduled cron refresh jobs and role-based permission checks.
- Added RFP upload with requirement-extraction status, sped up leads analytics with a single grouped query, and fixed a plaintext API-key exposure in an AI settings service.

ConsoleLLM, LLM assistant for CRM data · *FastAPI, Groq LLM, ChromaDB, sentence-transformers, MySQL*

- Contributed to a text-to-SQL service where the LLM writes a JSON query plan that is validated against an allowlisted schema and compiled into parameterized SQL, with a hybrid semantic-retrieval mode.
- Added multi-hop joins, fixed planner routing and date handling (“last month”), and stopped internal IDs and off-topic responses from reaching users.

Full Stack Engineer · AizTek Technologies · On-site, Rawalpindi *Apr 2026 – Present*

Plan With Grace, funeral-plan management platform for a UK client · *Grails 7.2.1, React 19, Vite, MySQL, RabbitMQ*

- Lead developer on the rebuild from the legacy Grails 3 app to Grails 7 and React 19, replacing frontend mockups with backend-driven pages for plans, payments, documents and reseller views.
- Integrated GoCardless direct debit, Xero invoices, HubSpot and Memoria sync, and RabbitMQ email/SMS; fixed payment-processing and uplift-report bugs and added CSV export.

Web Developer · Softezm · On-site, Rawalpindi *Aug 2025 – Nov 2025*

- Led development of a SaaS school management system (React, Node.js, Express) and set up Git branching and PR conventions for a three-person team.

MERN Stack Developer Intern · Crypstac · Remote *Jul 2025 – Sep 2025*

- Built React components and Express/MongoDB REST endpoints for a live product; refactored 5+ UI modules into reusable components.

PERSONAL PROJECTS

AI-Based E-Commerce Platform Storefront · Admin *React · Express · PostgreSQL · Gemini · Stripe*

- Natural-language product search: stop-word filtering and a PostgreSQL keyword pre-filter (up to 200 candidates), then Gemini picks the best matches as JSON; plus Stripe webhooks, Cloudinary uploads, JWT auth and an admin analytics dashboard.

QuickChat — Real-Time Messaging Live *React · Node.js · Socket.IO · MongoDB*

- Real-time chat supporting 15+ concurrent users, with online presence, typing indicators and JWT-secured WebSockets.

EDUCATION

BS Computer Science · PMAS-Arid Agriculture University, Rawalpindi · CGPA 3.84 / 4.00 *Expected May 2027*

- **Final Year Project:** PATRON, an AI-assisted referral hiring platform (in development) · **Coursework:** Artificial Intelligence, Data Structures, OOP, Software Engineering, Databases
