Abdul Rafay

Full Stack Developer

abdul.rafay9714@gmail.com | +92-326-5605724 | Islamabad, Pakistan

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 2+ years of professional experience designing, building, and deploying scalable web applications. Proficient in React.js, Node.js, Express.js, MongoDB, MySQL, Java, REST API development, JWT authentication, and real-time systems using Socket.IO. Delivered 5+ client projects on PeoplePerHour with 5-star ratings. Built production-grade applications including a SaaS School Management System and a real-time chat platform serving 15+ concurrent users. Strong foundation in JavaScript (ES6+), data structures, version control with Git, and agile development practices.

CAREER HIGHLIGHTS

- Engineered 5+ full-stack web applications for international clients using React.js, Node.js, Express.js, and MongoDB — consistently achieving 5-star ratings on PeoplePerHour.
- Built and deployed QuickChat, a real-time messaging platform supporting 15+ concurrent users with instant messaging, online presence tracking, and typing indicators using Socket.IO WebSockets.
- Led full-stack development of a SaaS School Management System managing student records, timetables, and staff dashboards in a unified platform at Softezm.
- Designed and implemented secure REST APIs with JWT authentication and role-based access control, delivering zero security incidents across all client deployments.
- Integrated Stripe Checkout and webhook handling for marketplace payment flows, including $19 listing fees with full lifecycle management.
- Reduced client onboarding time by standardizing project architecture with reusable React.js component libraries and modular Express.js API structures.
- Refactored 5+ UI modules into reusable React.js components, reducing code duplication and cutting future development time for similar features.
- Established Git branching conventions for a 3-person team, reducing merge conflicts through standardized pull request reviews and feature branch workflows.

PROFESSIONAL EXPERIENCE

Full Stack Engineer, AlxTel, Inc. *April 2026 – Present*

- Contributing to the development and maintenance of a government procurement automation platform built on Python, FastAPI, and React.
- Assisting in frontend development using React and Tailwind CSS under senior developer guidance.

- Learning and working with backend systems built on Grails and Spring-based architecture in a real-world production environment.
- Involved in building efficient, production-grade web solutions in a remote, US-based team environment.

Full Stack Engineer, AizTek Technologies *April 2026 – Present*

- Contributing to the development and maintenance of enterprise software solutions involving Python, FastAPI, and React-based systems.
- Assisting in building and testing full-stack features across frontend (React, Tailwind CSS) and backend (Python, Grails) layers.
- Gaining hands-on experience with scalable web application development in a professional on-site environment.

Full Stack Developer (Freelance), PeoplePerHour January 2024 – Present

- Engineered 5+ full-stack web applications using React.js, Node.js, Express.js, and MongoDB for international clients, achieving mostly 5-star ratings across all engagements.
- Designed and implemented secure REST APIs with JWT authentication and role-based access control, delivering zero security incidents across all client deployments.
- Reduced client onboarding time by standardizing project architecture with reusable React.js component libraries and modular Express.js API structures.
- Managed end-to-end project delivery independently, from requirements gathering through deployment on Vercel and Render, consistently meeting agreed deadlines.

Web Developer, Softezm August 2025 – November 2025

- Led full-stack development of a SaaS School Management System using React.js, Tailwind CSS, Node.js, and Express.js, enabling management of student records, timetables, and staff dashboards in a single platform.
- Integrated React.js frontend with Node.js REST APIs to deliver real-time data updates across the admin dashboard, improving operational efficiency for school administrators.
- Established Git branching conventions for a 3-person team, reducing merge conflicts by standardizing pull request reviews and feature branch workflows.

MERN Stack Developer Intern, Crypstac July 2025 – September 2025

- Contributed full-stack MERN features to a live production application by building React.js UI components and Node.js/Express.js REST API endpoints under senior engineer supervision.
- Integrated MongoDB collections with RESTful endpoints, improving data retrieval efficiency for the company's core product used by active users.

- Refactored 5+ UI modules into reusable React.js components, reducing code duplication and cutting future development time for similar features.

TECHNICAL EXPERTISE

Languages & Frameworks: JavaScript (ES6+), TypeScript, Python, C++, Grails (Groovy), Java

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Socket.IO

Databases: MongoDB, Mongoose, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, VS Code, npm, Vercel, Render, Linux (basic)

CORE COMPETENCIES

Full Stack Development | MERN Stack | REST API Design | Real-Time Systems | Payment Integration | Authentication & Authorization | Agile Development | Version Control | System Architecture | Performance Optimization | Performance Optimization | Legacy System Modernization | Team Collaboration

EDUCATION

Arid Agriculture University Rawalpindi – Bachelor of Science in Computer Science 2023 – 2027

• CGPA: 3.84/4.00 | Relevant Coursework: Data Structures, OOP, Database Systems, Web Technologies, Software Engineering

Punjab Group of Colleges, Gujar Khan – F.Sc Pre-Engineering 2020 – 2022

• Grade: A+
