

ABDUL RAFAY

Full Stack Engineer

abdul.rafoy9714@gmail.com · +92-326-5605724 · Rawalpindi, Pakistan

[Portfolio](#) · [GitHub](#) · [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years of hands-on experience delivering production software used in real-world environments, including a US-based government procurement automation system at AlxTel. Specialized in building scalable full-stack applications using React, Python (FastAPI), Node.js, and Grails, with a strong focus on API design, system reliability, and performance. Experienced in authentication systems (JWT), real-time communication (Socket.IO), and payment integrations (Stripe). Passionate about building end-to-end systems that solve complex business problems. CGPA 3.87/4.00 Computer Science student with a consistent track record of engineering execution and product delivery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, Groovy (Grails), Java

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, REST API Design, JWT Authentication, Socket.IO, Grails/Spring

Databases: MongoDB, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, VS Code, npm, Linux

Concepts: RBAC, Payment Integration (Stripe), Real-Time Systems, MVC Architecture, Agile, SDLC, OOP, Web Security

WORK EXPERIENCE

Full Stack Engineer · [AlxTel, Inc.](#)

Apr 2026 – Present

US Remote · Government procurement automation platform

- Develop and maintain features on a Python/FastAPI backend powering a government procurement automation platform within a US-based remote engineering team.
- Build React + Tailwind CSS frontend modules, translating design requirements into responsive, accessible UI components integrated with FastAPI REST endpoints.
- Contribute to a Grails/Spring-based legacy backend layer, delivering bug fixes and feature additions in a live enterprise production environment.
- Collaborate asynchronously with senior engineers via Git branching workflows, pull request reviews, and structured code feedback cycles.

Full Stack Engineer · [AizTek Technologies](#)

Apr 2026 – Present

On-site · Enterprise software development

- Contribute to enterprise software products built on Python, FastAPI, and React, working across the full stack from UI components to backend API logic.
- Implement and test full-stack features spanning React/Tailwind CSS frontend and Python/Grails backend, ensuring functional correctness across integration points.
- Participate in code reviews and collaborative development workflows within a structured professional engineering team.

Web Developer · [Softezm](#)

Aug 2025 – Nov 2025

Rawalpindi, Pakistan · On-site

- Led full-stack development of a SaaS School Management System using React.js, Tailwind CSS, Node.js, and Express.js, enabling centralized management of student records, timetables, and staff dashboards.
- Integrated React.js frontend with Node.js REST APIs to deliver real-time data synchronization across the admin dashboard, improving operational workflows for school administrators.
- Defined and enforced Git branching conventions for a 3-person development team, standardizing pull request reviews and feature branch workflows to minimize integration conflicts.

- Built React.js UI components and Node.js/Express.js REST API endpoints for a live production application, contributing full-stack MERN features under senior engineer supervision.
- Integrated MongoDB collections with RESTful endpoints, optimizing data retrieval patterns for the company's core product serving active users.
- Refactored 5+ UI modules into reusable React.js components, reducing code duplication and accelerating development velocity for future feature work.

PROJECTS

Classic Boats — Private Boat Marketplace | [React.js](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [Stripe](#) · [Cloudinary](#) · [JWT](#) [Live Demo](#)

- Built a full-stack private marketplace for classic and vintage boat enthusiasts featuring member approval workflows, an admin dashboard, and 10 platform rules enforced at the application layer.
- Integrated Stripe Checkout for \$19 listing fees with webhook-based payment lifecycle management, and Cloudinary for media uploads with auto-resize (up to 5 photos + 1 video per listing).
- Implemented JWT authentication with role-based access control (admin/member), 90-day listing expiry, duplicate post prevention, and 120-word description validation.

AI-Based E-Commerce Platform | [React.js](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [Stripe](#) · [Cloudinary](#) · [JWT](#) [Storefront](#) · [Admin Dashboard](#)

- Developed a full-stack e-commerce platform with dual interfaces: a customer storefront and a comprehensive admin dashboard covering product, category, and order management.
- Integrated Stripe payment gateway with webhook handling for secure checkout, and Cloudinary for optimized product image management with automatic compression and CDN delivery.
- Implemented JWT-based RBAC (admin/customer), shopping cart persistence, order history tracking, and real-time inventory management across the full stack.

QuickChat — Real-Time Messaging Platform | [React.js](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [Socket.IO](#) · [JWT](#) [Live Demo](#)

- Architected a real-time chat application supporting 15+ concurrent users with instant messaging, online presence tracking, and typing indicators via Socket.IO WebSocket connections.
- Secured all API routes and WebSocket connections with JWT authentication, implementing protected endpoints and persistent session validation across the full stack.

Blogify — Full-Stack Blogging Platform | [React.js](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [JWT](#) [Live Demo](#)

- Built a production-ready blogging platform with secure user authentication, full CRUD operations on rich-text posts, dynamic routing, and server-side pagination.
- Designed a fully responsive interface using React.js, rendering consistently across mobile, tablet, and desktop viewports.

EDUCATION

B.Sc. Computer Science · [Arid Agriculture University, Rawalpindi](#)

2023 – present

- CGPA: 3.87 / 4.00 · Relevant Coursework: Data Structures, OOP, Database Systems, Web Technologies, Software Engineering

F.Sc Pre-Engineering · [Punjab Group of Colleges, Gujar Khan](#)

2020 – 2022

- Grade: A+

CERTIFICATIONS

- Responsive Web Design — freeCodeCamp [Verify](#)
- Introduction to Frontend Development — Meta / Coursera [Verify](#)
- Programming with JavaScript — Meta / Coursera [Verify](#)
- Version Control — Meta / Coursera [Verify](#)
